

The goal of our Emergency Solutions Shelter is to help individuals and families find solutions to regain control over their lives. We do this by requiring every client to meet with the case manager to create goals and establish a case plan that focuses on their needs. While it would be a dream come true to have a goal that stated that we wish to find housing for every homeless person in Aiken County, we have to submit ourselves to setting the goal that we will do everything we can to provide the best care for each client who has the desire within themselves, to focus on their case management plan and goals to become the best version of themselves by taking control of their own lives. With United Way funding for the shelter, we were able to secure 44 beds for 24 nights for homeless men, women, and families with children in 2023.
